Summary

Full-Stack Developer with 2+ years of experience building scalable web and real-time applications. Strong expertise in Node.js, Express.js, React.js, Next.js, and MySQL, with hands-on experience in Redis, Kafka, and WebSockets. Specialized in SFU-based real-time systems using WebRTC and Socket.IO. Experienced in Dockerized deployments, AWS (EC2, S3), Nginx, and Linux environments. Proven ability to deliver enterprise CRM, workflow systems, and real-time platforms through direct client collaboration.

Skills

- | | |
|-------------------------------------|--|
| • Programming Languages: | JavaScript, TypeScript, Python |
| • Frontend: | NextJS, ReactJS, HTML, CSS, React Native. |
| • Backend: | NodeJS, ExpressJS, Django. |
| • Databases & Messaging: | MySQL, Redis, PL/SQL, MongoDB, Kafka |
| • Deployment & DevOps: | Docker, Nginx, Apache, AWS (EC2, S3), VPS Deployment |
| • Other Skills: | WebRTC (SFU), Socket.IO, RESTful APIs, Shell Scripting, Unix/Linux |

Experience

Full Stack Developer at Marworx Technologies Pvt Ltd

Oct 2023 - Present

- Developed and maintained full-stack applications using React.js, Next.js, Node.js, and MySQL.
- Deployed applications on cloud servers and VPS, configuring Nginx and Apache for optimized performance.
- Integrated Docker and Docker Compose for containerized deployment of Node.js/React apps, improving scalability and CI/CD efficiency.
- Conducted client meetings to gather requirements and translate them into functional application features.
- Led the development of a client project such as CRM system, KMS.
- Integrated real-time communication features using Socket.IO and WebRTC (SFU) for video/audio conferencing.
- Utilized Redis for caching and session management, Kafka for handling asynchronous messaging in microservice-style components.

Projects

Real-Time Video Conferencing App with SFU Architecture (03/2024 – Present)

- Developed a scalable, real-time video conferencing solution using WebRTC (SFU) and Socket.IO.
- Implemented features like user join/leave, video/audio toggling, screen sharing, and host-controlled waiting room.
- Managed real-time media streaming using Mediasoup, Redis (for session/state management), and Node.js backend.
- Deployed the system on AWS EC2 using Docker, with Nginx for routing and SSL.

SFC Environment – Equipment & Query Management System (06/2025 - Present)

- Built an admin and employee web portal for managing customer queries, assignments, and full query lifecycle tracking.
- Implemented equipment request workflows with multi-phase and sub-phase tracking, including failure and completion states.
- Maintained activity logs and audit trails for operational transparency.

Thermax HUL – VR-Based Training Management System (06/2025 - 12/2025)

- Developed the web admin application for monitoring and managing VR-based industrial training sessions using MERN (MySQL-based) architecture.
- Implemented real-time screen casting and session visibility from VR devices using Socket.IO signaling.
- Designed backend workflows leveraging SFU-based real-time architecture, with Redis for metadata and session state management.
- Integrated backend APIs to support training progress tracking, admin controls, and live session monitoring.

Subscription-Based CRM System with Workspace and Admin Panel (06/2024 - 01/2025)

- Built a subscription-based CRM with RBAC, workspace management, and centralized admin panel.
- Implemented job tracking, assignee workflows, automated backups, and system activity management.
- Designed auto-admin onboarding with user and permission control.
- Integrated web push, email, and WhatsApp notifications.
- Developed REST APIs using Node.js, Express.js, MySQL, with Redis caching.

Education

Anantrao Pawar College of Engineering and Research, Pune

B.Tech/B.E - Computer Engineering - SPPU (8.81 CGPA)

(08/2019 - 07/2023)

P.V.G's Muktangan Jr. College, Pune

Higher Secondary Certificate - HSC - (60%)

(06/2018 - 05/2019)

S.D. Katariya High School, Pune

Secondary School Certificate - SSC- (75%)

(06/2016 - 04/2017)
